

Ensure safety and environmental compliance on every job

No matter how big or how small, every job comes with regulations to meet and precautions to take. Protecting workers is crucial for every industry and leaving those workers in the hands of an inexperienced team just won't cut it. An experienced partner like SITEX eliminates guesswork and provides expertise around safety, rescue, hazmat, and environmental needs.

CHALLENGES OUR CLIENTS FACE

Reducing risk and ensuring compliance are just some of our clients' problems. Some of the most common challenges we see include:

Liability for every worker

Mishaps lead to legal problems. Working with an experienced partner removes liability and ultimately reduces fines and fees.

No qualified employees or continuous training

Some clients don't have qualified staff to meet certain regulations or the ability to continually train employees.

Emergency assistance required

Any situation that leads to an on-site team being needed immediately is a job that will require expertise.

The need to comply

Whether it's OSHA, MSHA, state, or federal regulations, any job can have numerous safety mandates they must abide by to avoid hefty fines.

Unable to hire or train experts full-time

On-site teams can be expensive and hiring a full-time employee for a 2-week job isn't feasible.

HOW SITEX HELPS CLIENTS

SITEX invests in highly trained and certified personnel so that our clients don't have to. These professionals ensure that clients meet their safety, rescue, hazmat, and environmental compliance needs by using the latest expertise and advanced solutions.

Here are just some ways SITEX helps clients every day:

Safety & Rescue Services

Occupational Safety and Health Services—

Keep workers safe through inspections, fit testing, and compliance assistance.

Rescue Services—On-site teams, well-prepared plans, and expert oversight provide peace of mind.

Technical Services—Highly trained professionals know how to best inspect, maintain, and repair the sophisticated equipment used by our clients.

Sales, Rental, and Repair—Address specific safety needs with the proper equipment for any situation to prevent harm and reduce risk.

Oil Field Services—Consultative, planning, safety, and monitoring services from an experienced oil field safety team.

Environmental and Industrial Hygiene Services

Environmental Services—Turnkey programs for Phase 1 assessments, monitoring, clean up, and remediation services from experienced professionals.

Indoor Air Quality—Test and monitor indoor air quality to keep occupants safe and minimize legal exposure.

Hazardous Materials—Guidance, preparation, and response services for handling dangerous materials should an incident occur.

Industrial Hygiene—Uncover gaps in protocol and find areas of risk to ensure compliance and proactively prevent industrial hygiene challenges.

SITEX Information Management or Asbestos Management Systems—Use SITEX's real-time interactive data management system to reduce hazardous material exposure.

Keep your workers safe with SITEX

SITEX's reason for being is to save people's lives. Working with SITEX is more than just a single job, single contact engagement. SITEX looks at every job to see the big picture across multiple tasks, and our team of experts is at our clients' disposal for the duration of the contract.

Contact your SITEX representative or call 1-800-408-1119 today and make sure your employees are safe at all times.
