

# Ensure **Safety** and **Compliance** on Every Job:

*SITEX invests in highly trained and certified personnel so that our clients don't have to*

# Why Clients Hire SITEX

## Ensure on-site compliance

Avoid fines and reduce liability by complying with OSHA, MSHA, state, and federal regulations.

## Pass liability to SITEX

Mishaps lead to legal problems. An experienced partner can remove liability and ultimately reduce fines.

## Qualified experts, when you need them

Some clients don't have qualified staff to meet certain regulations or the ability to continually train employees.

## Equipment costs and maintenance

The latest equipment can be expensive to purchase and time consuming to maintain, but renting equipment as needed can lower costs and save on maintenance time.

## Turnaround and Outage Experience

Turnarounds and outages come with their own unique challenges and SITEX has deep experience helping clients successfully complete both.

## Our Mission:

1. We exist to save people's lives.
2. Sole provider of EHS services.
3. Best in class training, professionalism, knowledge, resources, appearance, and growth opportunities for all employees.

# Total Safety Management

Working with a total safety partner means you can focus on your core business while our certified experts, led by CSPs, ASPs, and CIHs, completely handle safety and industrial hygiene in both normal operations and specific projects.

## Why SITEX?

**Safety Made Simpler** — Using one partner to handle all your safety needs gives you a proactive and flexible framework that addresses issues before they cause injury or illness.

**Reduce Costs, Increase Efficiency** — Our approach establishes a top-down safety culture that reduces liability, decreases hiring and training costs, and increases efficiency and productivity.

**Increased Safety ROI** — Total safety management replaces traditional reactive approaches to establish a company-wide culture of safety that improves the bottom line.

## Total Safety Management includes:

- Hazard Identification and Assessment
- Hazard Prevention and Control
- Education and Training
- Program Evaluation and Improvement
- Management Leadership
- Worker Participation
- Communication and Coordination for Host Employers, Contractors, and Staffing Agencies

## Challenges addressed by Total Safety Management:

- Talent Shortages
- Evolving Compliance Standards
- Rising Staffing Costs
- Soaring Injury Costs
- OSHA and Regulatory Inspections
- Inexperienced Safety Teams

# Safety Services

Increase workplace safety and health with specialized safety staffing, rescue teams, inspections, compliance assistance, and advanced solutions.

## Why SITEX?

**Safety First** — Every engagement starts with a focus on keeping workers safe and meeting all regulatory requirements.

**Certified Safety Experts** — Customers can transfer risk to our highly trained team members, led by CSPs, ASPs, and CIHs who prioritize safety on every job to reduce risk.

**Gain Access to Industry Knowledge** — Hiring SITEX means gaining access to a full team of experts and industry knowledge for any safety, rescue, or industrial hygiene challenges.

## Safety Staffing Services:

- Safety Supervisor
- Safety Coordinator
- Safety Technicians
- Confined Space Attendants (Fire Watch & Hole Watch)
- Certified Safety Professionals (CSP)
- Graduate Safety Practitioners (GSP)
- Construction Health & Safety Technicians (CHST)
- Tank Entry Supervisors (TES)
- On-site Standby Rescue Services

## Safety Solutions:

- Total Safety Management
- OSHA Compliance Audits/Hazard Inspections
- Turn-around (TAR) and Outage Services
- OSHA VPP Assistance
- Job Safety Analysis (JSA)
- Qualitative and Quantitative Respiratory Fit Testing

# Rescue Services

Make sure that every employee is able to go home at the end of the day with experienced rescue professionals who will plan and execute rescues for any situation.

## Why SITEX?

**Experience Matters**—Don't leave your team's safety in the hands of untrained teams. Work with the experts at SITEX to keep your team safe.

**Certified Rescue Teams**—Transfer the risk and difficulties of any rescue to a team of certified experts who consistently do this work.

**Rescue Teams for Any Job**—Whether you need a small 2-person team on-site or a full team of dedicated personnel, SITEX can make sure you're well-prepared.

## Rescue Services Include:

### On-Site Rescue:

- Rescue team staffing to suit any rescue job
- Confined Space and High Angle Rope Rescue
- Minimum medical training of first aid, CPR and AED with EMT's available
- Full-time, experienced rescue professionals available nationwide at anytime
- Evaluation, pre-planning and pre-rigging for each rescue job
- Confined space assessment, planning and rescue teams
- Trained fire watch and hole watch teams
- Complete inventory and classification of all confined spaces within your facility
- Compliance with OSHA 1910.146 requirements
- Pre-planning the most effective and efficient means of rescue in case of emergency

### IDLH Rescue:

- Dedicated rescue personnel, staged at the entry to your IDLH space with PPE and rescue gear in place
- All rescue technicians are extensively trained in performing rescue using SCBA and SAR systems

# Oilfield Services

The cleaning, repairs, confined spaces, and other hazards involved in oilfield operations make an experienced team a necessity. At SITEX, we're immersed in the industry and provide on-site expertise, planning, and oversight.

## Why SITEX?

**Safety First** — The oilfield requires knowledge of the industry and experience in the field. The team at SITEX has both.

**Reduce Shutdown Risks**—SITEX has provided safety and rescue services for numerous successful shutdowns and turnarounds.

**Focus on the Shutdown**—Our team will have permits, zoning, and safety regulations completed before the work starts so your team can focus on the shutdown and not the paperwork.

## Oilfield Services Include:

- Personal Protective Equipment (Sales/Rental/Service)
- Drill Rig Safety Consulting
- Site Safety Personnel
- H2S Contingency Plans
- Fixed Head Gas Detection Systems
- On-site Rescue Teams
- Confined Space Attendants (Hole Watch)
- Fire Watch Personnel
- Breathing Air System (Sales/Rental/Service)
- Job Site Permitting (Hot Work/Confined Space/Excavation)

# Industrial **Hygiene** Services

Get proactive about prevention and response to industrial hygiene challenges by using our teams of experts, led by Certified Industrial Hygienists (CIHs), to ensure your facilities are compliant and offer healthy working environments.

## Why SITEX?

**Improve Working Conditions** — Address environmental factors like air quality, mold, or noise to lessen or eliminate long-term risks of exposure.

**All-in-One Assessments** — Turnkey programs for Phase 1 assessments, monitoring, clean up, and remediation services from experienced professionals.

**Proactive Protocol Adjustments** — Uncover gaps in protocol and find areas of risk to ensure compliance and proactively prevent industrial hygiene challenges.

## Industrial Hygiene Services Include:

- Asbestos Inspections
- Asbestos Project Management / Air Monitoring
- Lead Inspections & Management
- Baseline Exposure Monitoring
- Sound Level Monitoring & Noise Mapping
- Industrial Hygiene Sampling Plans
- Ventilation Survey (Building or Plant)
- SDS Development / Review / Management
- Process Safety Management Audits
- Laboratory Services / On-site Analysis
- Certified Industrial Hygienists (CIH)
- And more

# Environmental Services

Make sure your work is following regulations and avoid roadblocks by assessing sites and monitoring for environmental issues.

## Why SITEX?

**Meet Environmental Regulations**—With the growing need to meet shifting regulations, a trusted team of environmental experts can help companies avoid costly non compliance issues.

**Keep Workers Healthy**—Environmental issues that go unaddressed can lead to long term health risks and increased litigation for companies.

**Know Your Space**—Our certified professionals will assess your site to not only uncover but proactively address any and all environmental issues so they don't come back to hurt your bottom line.

## Environmental Services Include:

- Phase I Environmental Site Assessments
- Phase II Environmental Site Assessments
- Subsurface Investigations/Groundwater Monitoring
- Underground Storage Tank Closure & Petroleum Storage Tank Remediation Projects
- Brownfield Redevelopment Program Applications & Management
- Voluntary Clean-up Program & Site Remediation Program Oversight
- Site Development Environmental Turn-key Services
- Storm Water Monitoring & NPDES Compliance Services
- Spill Prevention Control & Countermeasure (SPCC)
- Program Manuals
- Regulatory Compliance Audits
- Wetlands Studies
- Vapor Intrusion Surveys
- Baseline Environmental Studies/Feasibility Studies
- Environmental Emergency Response Services
- Waste Management

# Indoor **Air Quality** & Hazardous Waste Services

Avoid injuries and ailments related to poor air quality or hazardous waste with a team that will survey and monitor for numerous potential health issues.

## Why SITEX?

**Improve Air Quality for Workers**—Indoor air can be 2-5 times more polluted than outdoor air according to the EPA, especially for in industrial environment.

**Trust in Experts**—SITEX professionals have years of experience planning and handling hazardous materials that some teams may not know how to deal with.

**Reduce Avoidable Ailments**—Poor air quality and hazardous materials can lead to headaches, fatigue, sore eyes, and even heart disease or cancer if not handled properly.

## Indoor Air Quality and Hazardous Waste Services Include:

- Indoor Air Quality (IAQ) Surveys & Management
- Mold & Moisture Inspections & Management
- Mold Remediation Design & Project Management
- Mold Awareness Training
- Pressure Differential Testing
- Radon Testing
- Process Safety Management
- Process Hazard Analysis (PHA-HAZOP)
- Piping & Instrument Diagrams (P&ID)
- HAZMAT Database Management System
- HAZMAT Spill Response Management
- HAZMAT Emergency Spill Response Services
- HAZMAT Management Services
- Hazardous Waste Management

# Safety Equipment Rental

Safety equipment is necessary on any job, but costs and maintenance time requirements can be high. Equipment rentals from SITEX can address both of those challenges.

## Why SITEX?

**Lower Equipment Costs** — Safety equipment purchases can be hard to justify due to increasing costs.

**Reduce Maintenance Time** — Equipment needs to be maintained so it works properly, and that takes time.

**Use The Latest Solutions** — Don't miss out on the latest technology because of poor purchasing decisions ever again.

## Equipment Rentals & Technical Services Include:

- Air & Gas Monitors: Honeywell BW Max XT II
- Air & Gas Monitors: Honeywell BW Microclip Personal Monitor
- Tripod + Winch Systems
- Air Systems
- Breathing Air Trailers
- Air Filtration Panels (Breather Boxes)
- Testing Equipment
- Ventilation
- Water and Air Quality Testing
- Safety Eyewear
- Hearing Protection
- Hand Protection
- Respiratory Protection
- Fall Protection
- Safety Clothing
- Lockout/Tagout
- First Aid and Bio-safety
- Water and Airtight Cases
- Flashlights and Bulbs
- Construction, Facility and Plant Safety Equipment
- Custom Signage, Tags and Tape
- Emergency Response Equipment
- Spill Control and Containment Equipment
- Industrial Hygiene Instrumentation
- Breathing Air Cascade Systems
- Gas Detection (Portable & Fixed)
- Decontamination Equipment
- Confined Space Equipment
- Fire Extinguisher (Inspections, Repair, Refill)
- Instrument Calibration, Maintenance & Repair
- Qualitative & Quantitative Respiratory Fit Testing
- SCBA Inspection, Maintenance & Repair
- Harness & Lanyard Inspection & Cleaning
